FLY 68
Azimut

Triple-Zone Living, Carbon-Tech Edge

FLY 68 is an Azimut Fly 68 blending contemporary Italian styling, advanced construction and versatile flybridge living. Flowing exterior lines, expansive glazing and carbon-fibre superstructure technology reduce weight while enhancing efficiency, volume and the yacht's connection with the surrounding sea.

The contemporary interior features intelligent spatial planning, premium materials, a full-beam owner's suite, elegant guest accommodation and separate crew quarters. Outside, the flybridge, aft cockpit, foredeck lounge and generous swim platform provide flexible areas for alfresco dining, entertaining and easy access to the water.

Responsive handling, efficient performance and modern stabilisation make FLY 68 equally comfortable on coastal passages or longer Mediterranean adventures. She offers a compelling next step for owners seeking greater space and sophistication without losing the agility, usability and sociable character of a modern flybridge yacht.

Gross Tonnage: -

Engines: 2, Volvo, IPS 1350, 1000 Hp, Diesel

Cruising Speed: 27 knots

Max Speed: 32 knots

Range: 424 nm @ 27 knots

Classification: CE

Description

Accommodation Overview:

Accommodation for 8 guests in 4 staterooms. 2 crew.

Owner
Within the 4-cabin layout, the accommodation concept is shaped by Achille Salvagni Architetti and supported by a 5,23 m beam. A multifunctional bow with sofas converting into sunpads and a triple-zone flybridge extend the living experience outdoors. Head compartments total 3 + 1 crew across the stated arrangement aboard here.

Guests
Guest accommodation forms part of the 4-cabin plan, with 8 + 2 crew berths in total. The layout is matched to seamless outdoor living, linking interior comfort with exterior relaxation areas. Alberto Mancini exterior design and the carbon fibre-enhanced structure support the character seen throughout this 20,98 m platform aboard.

Crew
Crew accommodation is arranged as 1 crew cabin with 2 crew berths and 1 crew head compartment. Onboard systems explicitly include air conditioning, an Aircare Energy Saving system, and integrated control and monitoring accessible from interior and exterior helm stations. These features support daily operation within the yacht crew area.

Machinery Details

Main Engines:

2x Volvo Penta IPS 1350 (1,000 Hp)
7,9 l/nm at 15,2 kn
9,9 l/nm at 27 kn
Twin pod propulsion / Volvo Penta IPS propulsion system
